

Report MED Green Network

1. It is necessary to review and relaunch the way in which the Network works in order to make it more useful; the finality is to help weak Mediterranean parties and to develop common debates on issues of common interest.
2. Considering the limited resources, it is proposed to held the next meeting of the Network in occasion of the next Council; the participants ask the Committee to schedule a longer time for this network in October so as to finalize a working plan and to discuss about which issues should the network deal with;
3. The participants suggest that the meeting foreseen in Turkey is not specifically a meeting of the network, but an activity supported by the EGP which sees the participation of one or two external speakers;
4. It is also suggested that the strongest parties like the French Greens, the ICV, the Greek Greens take a clear commitment to support and accompany the development of weaker parties;
5. It was also suggested to use the Summer university in Spain as a further occasion of “Mediterranean” networking;
6. It is also suggested to re-establish a mailing list with the participants of the Mediterranean network and to specify on which topics we have to develop our proposals for the next years (migration, nuclear, land use, agriculture were mentioned)
