Insert from line 4 to 5: democracy and creating instruments for citizens' participation that could ultimately transform the European elections into a truly transnational election, reflecting the diversity of the electorate across the EU.	This is to stop the fear that any 'transnational election' would end up being dominated by the larger states or larger Green Parties
2	AM-6-1	Miljöpartiet de gröna	Despite these efforts and an overall majority in the European Parliament to introduce transnational lists for a small proportion of seats, the democratic aspirations of EU citizens have been met again by the unwillingness of member states governments to advance on this important reform. Given this blockage, it is unlikely to impossible that transnational lists can be a reality for the 2024 elections. Given this blockage, it is unlikely to impossible that transnational lists can be a reality for the 2024 elections.	Delete this and the paragraph after (the motion tool didn't allow it to be the same amendment). We are against transnational lists and we see these two paragraphs as irrelevant.

It would also be good that they would have the nomination of their member party before the online congress.
