

No.	Party	Line	Action	Current Text	Proposed Amendment	Explanation/Comment
3	Bündnis 90/Die Grünen	10	delete	, its member parties and partner organisations within a European context		
5	LMP Hungary	19	add new point		3. Donation from influential companies such as banks or large multinational corporations will be considered only after evaluation of political and business interest of major owners and decision makers on the basis of green principles.	Donation exclusion described in Point 2. does not cover the situation where the company's actions and aims are not inconsistent with green principles but the interest of background actors (individuals or companies) are.  Risks: 1. Background actors can use their influence through the accepted company donation. 2. Background actors can be recognised by the public and their reputation is a political risk.
4	Bündnis 90/Die Grünen	46	replace	The EGP will publish a list annually, specifying both donor and donation	The EGP will publish a list annually, specifying both donor and donation <b>by taking into account the relevant laws</b>	
2	Die Grünen Austria	48	replace	12000	3500	Green should be the most transparent Party, we should avoid any chance to get under suspicion of being bought in, of being influenced by donation, of having anything to hide. For this reason Austrian Greens think that we should set extra high standards in terms of transparency and finances. Secondly we think that seen from the point of view of an “ordinary” citizen 12 000,- Euros are about the average yearly netto income in the poorer member states, even in the richer ones this is a half year netto income. Even 3500,- is still a lot of money for many of our potential voters and in terms of our will to openly show that green can be supported but not corrupted or influenced toward a non green position it should be our interest to not give any basis for doubts.

6	LMP Hungary	62	add		<p>Donations from any company if its information on natural person owner background is not available on-line to the general public free of charge.</p>	<p>Greens are fighting against the negative effects of off-shore businesses. The credibility of greens is relying very much on their commitment towards transparency. Greens must assure their voters and the public that they act the way they speak. This amendment assures that EGP checks the background of all financial supporters but also sends the message that Europe needs to have a completely transparent and available information on company owners.</p>
