12	ICV	35	add a new point		- Finds it unacceptable that the EU's main response to the current humanitarian crisis of migrants is still focused in closing its borders to external neighbouring countries, making it more difficult to reach EU territory. We reinforce our stand for a European migration and refugee policy that is based on respect for life and human rights, and in full compliance with the EU and international law. We reiterate that practices under national law violating EU and international law, and the principle of non-refoulement should be stopped immediately. We thus express our serious concerns in relation to the recurrent illegal practices undertaken by some member states towards migrants, such as on-the-spot deportations in Melilla's bordering fence, in many cases involving fleeing refugees and asylum-seekers whose life may be at risk.	accepted to add to line 22: National practices violating EU and international law, which often involve asylum seekers, such as on-the-spot deportations in the area of Melilla's bordering fence must be brought to an end.
