6	AM-27-1	Green Party of England and Wales	<p>There is a sharp correlation between high levels of education and a decline in mental illness. Furthermore, schools play a key role within communities. Therefore, mental health in school curricula and services, such as counselling,</p>	<p>Insert from line 26 to 28:</p> <p>There is a sharp correlation between high levels of education and a decline in mental illness. <u>Delete first sentence "There is a sharp correlation.... mental illness." and replace with "The educational system can have a profound and lasting effect on children's mental health."</u></p>	<p>Compromise carried:</p> <p><i>Access to education, with the social and societal benefits it potentially brings, creates a bedrock for mental health in our society. Higher levels of education itself have been shown to correlate with lower rates of mental ill-health. Furthermore, schools play a key role within communities. Yet, the education system can often fail to be accessible in itself, or to take into account the needs of those inside it, having a profound and lasting negative effect on the mental health of students. With this in mind, the guarantee of a right to free and accessible education, including an accessible, inclusive and safe educational environment is thus crucial for children and adults alike. Therefore, mental health in school curricula and services, such as counselling, must be radically instituted or improved. We need an educational system that accommodates and nurtures both neuro-psychiatric conditions, such as those with ADHD and autism, and people with different mental health needs, like anxiety and depression. A broader purpose of public education must also consider integrational and cultural education migrant and refugee communities, and (re-)integrational, rehabilitative and cultural services for invisibilised peoples.</i></p>

7	AM-28-1	Greens/EFA Group in the European Parliament	<p>mental illness. Furthermore, schools play a key role within communities. Therefore, mental health in school curricula and services, such as counselling, must be radically instituted or improved. A broader purpose of public education must also consider integrational and cultural education for migrant and refugee</p>	<p>From line 27 to 30:</p> <p>mental illness. Furthermore, schools play a key role within communities. Therefore, mental health in school relevant professional curricula and services, such as counselling, must be radically rapidly instituted or improved. A broader purpose of public education must also consider integrational and cultural education for migrant and refugee</p>	<p>Compromise carried:</p> <p>In the preamble on education (lines 27-29):</p> <p>Furthermore, schools play a key role within communities. Therefore, mental health in school curricula and services such as counselling must be rapidly instituted or improved so that children can, from a young age, already be taught to understand their emotions and mental states through emotional education, to destigmatise mental illness, and to provide them the care they need. Those providing such curricula or services and those working in related professional fields that deal with mental wellbeing of others should especially receive the proper intersectional education and training, including sensitivity training, to equip them to deal with this.</p> <p>In clause 1 under education (lines 91-92):</p> <p>Develop and introduce age-appropriate education on mental health literacy, including emotional education and education on neurodiversity into school curricula starting from primary education;</p> <p>In clause 6 under mental health services (lines 143-145):</p> <p>Increase funding for intersectional education, research, diagnosis and treatment and care of mental health to appropriately address the severity of this crisis. This includes intersectional education on mental health and mental health-relevant education, such as trauma-informed training, neurodiversity awareness training and sensitivity training for both (mental) health professionals and all related professions that deal with the mental wellbeing or addressing mental care of others outside medical care as well, such as counsellors and HR managers; Add as new clause 7 under mental health services: Recognise, appropriately research, and care for deteriorating mental health in the context of the climate crisis (e.g. climate anxiety and eco-depression), without pathologising what is a legitimate reaction to one's social environment.</p> <p>In clause 2 under systemic discrimination (lines 151-153):</p> <p>Implement and fund inclusive policies, practices, and research agendas in (mental) health education and the healthcare system, such as racial, gender, disability and LGBTQIA+ sensitivity and cultural competence training of (mental) health professionals, as well as for all related professions that deal with the mental</p>

10	AM-45-1	Vihreät - De Gröna	<p>throughout Europe, and furthermore, placed vulnerable individuals in situations of precariousness, exploitation, unemployment, and financial instability. The global capitalist system has normalised a culture of overwork, with all 15 European countries surveyed in 2021 reporting a burnout rate of 45% or higher. This is abnormal – we must neither live to work nor work to live – we must work</p>	<p>From line 44 to 48:</p> <p>throughout Europe, and furthermore, placed vulnerable individuals in situations of precariousness, exploitation, unemployment, and financial instability. The global capitalist system has normalised a culture of overwork, with all 15 European countries surveyed in 2021 reporting a burnout rate of 45% or higher. Current work culture is unsustainable in many ways. The increased demands caused by a working culture which encourages overworking has a grave negative impact on the mental health of individuals, including causing exhaustion and burn out. The normalisation of unsustainable working culture is a societal issue and needs to be addressed as such. The World Health Organisation 2022 World Mental Health Report indicates that globally one in eight people live with a mental health disorder, but resources for help and support are gravely under resourced. The same report lists</p>	<p>Compromise carried:</p> <p><i>The current work culture normalised under capitalism is unsustainable and needs to be addressed as a societal issue. This work culture increases demands on individuals caused by a constant pressure to overwork, which has a grave negative impact on the mental health of individuals, including causing exhaustion and burnout. World Health Organisation 2022 World Mental Health Report indicates that globally one in eight people live with a mental health disorder, but resources for help and support are gravely under-resourced. The same report lists e.g. decent work, community and safe environment as factors contributing to a better mental health.</i></p>
