

**Draft**

**Title:** **European Greens continue to stand in undivided solidarity with Ukraine**

**Tabled by:** SF-Green Left, Denmark

**Draft text**

1 As the horrific Russian war of aggression continues, we as European Greens  
2 reaffirm our undivided solidarity and support for Ukraine and its struggle for  
3 freedom and peace. We recognise that this illegal, unjustified and unprovoked  
4 war waged against a fellow European country is an attack on all of us and on our  
5 common European values. We continue to condemn, in the strongest possible terms,  
6 Russia's war and the Belarussian involvement, the committed human rights  
7 violations and war crimes, including forced deportation of Ukrainian civilians  
8 to and forced adoption of Ukrainian children in Russia.

9 As we had to witness Russia's further escalation of the war, we strongly condemn  
10 the recent increase in targeted attacks against civil infrastructure across  
11 Ukrainian territory and Russia's illegal annexation of Ukraine's Donetsk,  
12 Luhansk, Zaporizhzhia and Kherson regions violating Ukraine's independence,  
13 sovereignty and territorial integrity. Russia's war continues to threaten peace  
14 and security in Europe and worldwide and has severe global consequences in the  
15 form of increased food insecurity and rising price. As European Greens, we  
16 utterly condemn Putin using hunger and energy as weapons in his illegal war.

17 Therefore, having regard to its previous resolution on Ukraine adopted at the  
18 35<sup>th</sup> EGP Council, we, the European Greens:

- 19
- Demand that the responsible government officials and military leaders of  
20 the Russian Armed Forces and those committing human rights violations and  
21 war crimes must be held accountable under international law.

- Call on the EU institutions and the Member States, as well as EU partners, to uphold and to implement further sanctions against the Russian Federation, and specific individuals, as swiftly as possible and urge Member States to show unity regarding the sanction packages.
  - Call on the EU institutions and the Member States, as well as EU partners, to provide all the necessary support to Ukraine, including delivery of necessary arms.
  - Call on the EU institutions and the Member States to increase its humanitarian aid for the Ukrainian society, with special regard to vulnerable groups, minorities, women and children, and to increase cooperation with civil society and free media firstly in Ukraine, but also in Belarus and Russia.
  - Support all Russian citizens protesting and fighting the current regime from within or outside of Russia and urge Member States to increase the issuance of humanitarian visas to Russian citizens in need of protection.
  - Demand an unwavering monetary and structural support for Ukraine in its efforts of post-war recovery that goes hand in hand with ambitious green transition solutions.
  - Call on the EU institutions and the Member States to provide Ukraine with a clear perspective of EU accession.
  - Reaffirm the commitment to the sovereignty, territorial integrity and independence of Ukraine, the Republic of Moldova and Georgia within their internationally recognised borders also with regards to their eventual EU accession; call on the EU institutions and the Member States to accelerate efforts to support these countries in ending occupations and solving any remaining territorial disputes.
  - Condemn Russia's efforts to undermine the security and safety of Ukraine's nuclear facilities as well as Russia's threats of using weapons of mass destruction and call on Russia to immediately cease its threats of a nuclear escalation,
  - Express our concern over the recent methane leaks from the Nord Stream 1

53 and 2 pipelines, leading to a gas leak corresponding to Denmark's average  
54 CO2 release for more than half a year, and urge for a full investigation  
55 of the incident and for harsh measures to hold those responsible to  
56 account as well as urgent steps across the EU to secure critical  
57 infrastructure, in particular in regard to energy supply.

- 58 • Demand intensive efforts to secure European independence from fossil fuels  
59 to stop financing totalitarian regimes, and instead to increase efforts to  
60 realise and speed up the green transition by furthering the expansion of  
61 renewable energy in Europe.

62 We as European Greens acknowledge that we find ourselves in a global polycrisis  
63 and we must accelerate the Green transition in order to overcome its root cause,  
64 the climate crisis. Hence, we remain fully committed to act decisively and  
65 swiftly to tackle the multiple crises - be it as parts of governments or as a  
66 strong opposition putting pressure on EU institutions and the Member States.

67 We know that in times of war and insecurity with autocrats using energy supply  
68 as a weapon and a lever the green transition is our only pathway to independence  
69 and freedom in security. We reiterate that a green transition, that serves  
70 people and the planet, needs to be just so no one is left behind. Therefore, we  
71 as European Greens remain committed to fight for social justice in times of  
72 instability, economic uncertainties, and the ongoing inflation. We will continue  
73 to fight for the implementation of efficient and fair mechanisms to cushion the  
74 social impact of the recession, such as the windfall tax, and we acknowledge  
75 that European countries also bear a historic global responsibility, in  
76 particular in the current dire economic situation. For us it is clear: We  
77 continue to stand in undivided solidarity for Ukraine, we will stay united and  
78 we will not let Putin win in dividing us.
